PROFESSIONAL SUMMARY

3rd year CS student at AGH University (**GPA 4.73/5**), with an Erasmus semester at NOVA School of Science and Technology. **Full-stack developer** with hands-on experience across frontend, backend, testing, and cloud infrastructure. Dedicated to building seamless and well-tested user experiences.

SKILLS

- **Frontend & UI:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML/CSS
- **Backend & DB:** Node.js, Fastify, Express.js, Zod, Java, SQL/NoSQL, Redis
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, GitHub Actions, Git
- **Testing:** Playwright, Vitest, React Testing Library

WORK EXPERIENCE

Testing Processes & Automation Intern | ABB

April 2026 - Present

- **Built a full-stack test automation platform from scratch** (TypeScript, Playwright, Fastify, Next.js) for a core product configurator undergoing a legacy-to-new rebuild, scaling across **170+ regional instances**.
- **Architected a plugin-style abstraction layer** for distinct DOM architectures. Built a **custom API and React dashboard** to fully configure and trigger tests with real-time SSE log streaming.
- **Engineered a checkpoint-based state-recovery mechanism** detecting stuck modals mid-run to resume traversal, **eliminating false failures** in long regression suites.
- **Built dual-mode GitHub Actions workflows** (fail-fast on first error vs. complete run with exhaustive logging) containerized with Docker for Azure Container Apps to handle massive test execution, uncovering **50+ production defects**.

Tech: TypeScript, Playwright, Fastify, Next.js/React, Zod, SSE, Docker, Azure Container Apps, GitHub Actions

RECENT PROJECTS

Lawyer Website Redesign & CMS | advocate.matviiv.com

Nov 2025 - Feb 2026

- **Built a statically generated Next.js site** deployed on AWS S3, with Keystatic CMS so the client can publish articles without touching code.
- **Engineered a custom Node.js migration pipeline** using Turndown to convert the old site's messy raw HTML into clean Markdown.
- **Built mobile-first from scratch** with Tailwind CSS and applied TDD throughout using Vitest and React Testing Library.

Tech: Next.js, React, Tailwind CSS, Keystatic CMS, AWS S3, Node.js, Vitest, React Testing Library

Student Testing Platform | github.com/LilConsul/hell-app

April 2025 - June 2025

- **Lead on frontend development**, managing the team's Git workflow and conducting PR reviews.
- **Implemented student and teacher interfaces** covering auth, exam management, student dashboards, and shared views.
- **Extended Shadcn/ui with custom components** (debounced inputs, date-time pickers, pagination) using Tailwind CSS for UI consistency.

Tech: JavaScript, React, React Router, Tailwind CSS, Shadcn/ui, Vite

ADDITIONAL INFORMATION

- Bachelor of Computer Science in AGH university of Krakow
- Erasmus studies in NOVA School of Science and Technology

Oct 2023 - Feb 2027

Sep 2025 - Jan 2026

EDUCATION

- **Languages:** English, Ukrainian, Polish
- **Awards/Activities:** Rectors scholarship in AGH university of Krakow, Deployed's Frontend workshop, Software Mansion x Gemini Hackathon
- **Certificates:** [Software Engineer](#), [Principles of UI/UX Design](#), [Frontend Developer \(React\)](#), [Developing Back-End Apps with Node.js and Express](#)
