PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience across frontend, backend, testing, and cloud infrastructure. Dedicated to building seamless and well-tested user experiences.

SKILLS

- **Frontend & UI:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- **Backend & DB:** Node.js, Fastify, Express.js, Zod, Java, SQL, NoSQL, Redis
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, GitHub Actions, Git, Databricks, PySpark
- **Testing:** Playwright, Vitest, React Testing Library

EXPERIENCE

Testing Processes & Automation Intern | ABB

April 2026 - Present

- **Engineered a full-stack, distributed test automation platform from scratch** for a core product configurator, scaling execution across **170+ regional instances**.
- **Architected a plugin-style abstraction layer** for distinct DOM architectures. Built a **custom API and React dashboard** to fully configure and trigger tests with real-time SSE log streaming.
- **Built a self-healing, checkpoint-based state-recovery mechanism to eliminate false failures** in long regression runs, and deployed containerized Docker test suites via Azure Container Apps and GitHub Actions.

Tech: TypeScript, Playwright, Fastify, Next.js/React, Zod, SSE, Docker, Azure Container Apps, GitHub Actions

Data Engineering Trainee | SoftServe Databricks Academy

June 2026 - Present

- Selected for a competitive pipeline focused on Azure cloud infrastructure and Lakehouse architectures.
- **Built ETL pipelines** with PySpark and SQL, utilizing Auto Loader for incremental streaming.
- **Designed Medallion schemas** applying SCD transformations in Delta Lake.

Tech: Azure, Databricks, PySpark, Delta Lake, Unity Catalog, SQL

RECENT PROJECTS

Nov 2025 - Feb 2026

Lawyer Website Redesign & CMS | advocate.matviiv.com

- **Built a statically generated Next.js site** deployed on AWS S3, with Keystatic CMS so the client can publish articles without touching code.
- **Engineered a custom Node.js migration pipeline** using Turndown to convert the old site's messy raw HTML into clean Markdown.
- **Built mobile-first from scratch** with Tailwind CSS and applied TDD throughout using Vitest and React Testing Library.

Tech: Next.js, React, Tailwind CSS, Keystatic CMS, AWS S3, Node.js, Vitest, React Testing Library

Student Testing Platform | github.com/LilConsul/hell-app

April 2025 - June 2025

- **Lead on frontend development**, managing the team's Git workflow and conducting PR reviews.
- **Implemented student and teacher interfaces** covering auth, exam management, student dashboards, and shared views.
- **Extended Shadcn/ui with custom components** (debounced inputs, date-time pickers, pagination) using Tailwind CSS for UI consistency.

Tech: JavaScript, React, React Router, Tailwind CSS, Shadcn/ui, Vite

EDUCATION

Bachelor in Computer Science | AGH University of Krakow (GPA 4.73/5)

Oct 2023 - Feb 2027

- **Erasmus Semester:** NOVA School of Science and Technology (Sep 2025 – Jan 2026)
- **Honors & Activities:** Rector's Scholarship, Software Mansion x Gemini Hackathon, Deployed's Frontend Workshop

LANGUAGES & CERTIFICATION

- **Languages:** English, Ukrainian, Polish
- **Certificates:** [Software Engineer](#), [Principles of UI/UX Design](#), [Frontend Developer \(React\)](#), [Developing Back-End Apps with Node.js and Express](#)
